**DIRECTIONS FOR USE:**

DO NOT apply directly to food, food packaging or food contact surfaces.

DO NOT place in exposed areas accessible to children, pets and other animals.

SITUATION	PEST	RATE	CRITICAL COMMENTS
In and around domestic, commercial and institutional buildings: (e.g. hospitals, aged care facilities, schools, food processing areas, offices, shops, motels, barracks, ships	Nuisance ants including Black house ant ( <i>Ochetellus glaber</i> ) White footed house ant ( <i>Technomyrmex albipes</i> ), Pavement ant ( <i>Tetramorium</i> sp.) and Argentine ant ( <i>Linepithema humile</i> ).	Apply as spots of 0.5 mL (approximately 5 mm in diameter) per m <sup>2</sup> around the nest entrance, along ant trails or where ants are most active.  Use sufficient number of baiting points to maximize bait uptake.	Place bait on non-porous horizontal surfaces or in bait stations at intervals along ant trails and/or where ants are seen.  Place securely in areas where bait will not be flooded or from which the bait can be removed by normal cleaning. Do not spray any repellent insecticides on or around the bait and do not apply where such products have recently been used. The use of non-repellent insecticides such as the Phantom and Termidor range of products is acceptable to use in close proximity to the bait placements.  Use sufficient number of baiting points to maximise bait uptake. The greater the number of baiting points the greater the chance of control since more ants will be able to access the bait.  Refer to General Instructions for additional information.

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.

**GENERAL INSTRUCTIONS**

Ants are attracted by the sugary bait. They ingest the bait with the active substance and take it back to the nest to feed their brood. An effect on the ant population can be expected within 7 days. It is advisable to check treated areas 1-2 weeks after the initial application. If complete bait consumption and continued ant activity indicates a particularly large or challenging infestation, a second application may be required. GOLIATH LIQUID ANT BAIT is formulated as a sugary honeydew which may not be attractive to all species of ants. If ants are not attracted to the bait, a protein bait such as Amdro Ant Bait should be used or an alternative management technique such as the Phantom and Termidor range of products may be required. Care should be taken before the treatment that alternative sources of food (specifically sugar sources, food remainders, etc.) for ants are removed. Food and food waste that is left lying around distracts the foraging worker ants. For maximum stability and effectiveness bait drops should be placed on non-absorbent horizontal surfaces, with external applications protected from rainfall in bait stations or with suitable coverings wherever possible. GOLIATH LIQUID ANT BAIT can be wiped off from areas that have been treated unintentionally using a moist paper tissue, which can be added to the domestic garbage. Clean this area thoroughly. For treatments in food processing areas or kitchens, bait stations are recommended.

**RESISTANCE WARNING**

For insecticide resistance management GOLIATH LIQUID ANT BAIT is a Group 2B insecticide.

Some naturally occurring insect biotypes resistant to GOLIATH LIQUID ANT BAIT and other Group 2B insecticides may exist through normal genetic variability in any insect population. The resistant individuals can eventually dominate the insect population if GOLIATH LIQUID ANT BAIT or other Group 2B insecticides are used repeatedly. The effectiveness of GOLIATH LIQUID ANT BAIT on resistant individuals could be significantly reduced. Since occurrence of resistant

individuals is difficult to detect prior to use, BASF Australia Ltd accepts no liability for any losses that may result from the failure of GOLIATH LIQUID ANT BAIT to control resistant insects.

GOLIATH may develop resistance. To manage this risk, users should implement specific resistance management strategies. For further information contact your local supplier, BASF Australia Ltd representative or local agricultural department agronomist

### PRECAUTIONS

DO NOT allow Avoid contact with food, food utensils, or places where food is prepared or stored.

### PROTECTION OF LIVESTOCK, WILDLIFE, AND OTHERS

DO NOT contaminate streams, rivers or waterways with the chemical or used containers. DO NOT apply this product in any areas easily accessible to children or animals.

### STORAGE AND DISPOSAL

KEEP OUT OF REACH OF CHILDREN. Store in the closed, original container in a cool, well ventilated locked place out of the reach of children. Do NOT store in direct sunlight. Dispose of empty container by wrapping in paper, placing in plastic bag and putting in the garbage.

### FIRST AID

If poisoning occurs, contact a doctor or Poisons Information Centre. Telephone 131126 Australia-wide.

### SAFETY DIRECTIONS

May irritate the eyes and skin. Avoid contact with the eyes. and skin. When using the product wear elbow length chemical resistant gloves. If product on skin, immediately wash area with soap and water. Wash hands after use. After each day's use wash gloves.

### MATERIAL SAFETY DATA SHEET

Additional information is listed in the Material Safety Data Sheet available from your supplier.

### CONDITIONS OF SALE

All conditions and warranties rights and remedies implied by law or arising in contract or tort whether due to the negligence of BASF Australia Ltd or otherwise are hereby expressly excluded so far as the same may legally be done provided however that any rights of the Buyer pursuant to non excludable conditions or warranties of the Trade Practices Act 1974 or any relevant legislation of any State are expressly preserved but the liability of BASF Australia Ltd or any intermediate Seller pursuant thereto shall be limited if so permitted by the said legislation to the replacement of the goods sold or the supply of equivalent goods and all liability for indirect or consequential loss or damage of whatsoever nature is expressly excluded. This product must be used or applied strictly in accordance with the instructions appearing hereon. This product is solely sold for use in Australia and must not be exported without the prior written consent of BASF Australia Ltd.
